

NAB's petition 04-160 seems to me an attempt to halt the American free market. If a company like XM comes out with a quality product for its cosumers, it should have the right to keep providing it. I am a supscriber to XM, and enjoy the options it provides. I don't solely listen to XM, I still listen to my local stations. XM to me is just another option for radio listening. XM has not raised its prices to provide these additional services, and they treat their customers well. It looks to me that NAB just doesn't want competition, and without competition we are removed of our freedom of choice.
